About Me

Telecommunications engineer at the intersection of engineering, data, product, and business — with a focus on finance and business transformation through technology. Experienced in designing and deploying production-grade AI systems in fintech, with a growing interest in finance itself and the business logic behind financial tools. Driven by curiosity about the reasoning behind product decisions, purposeful, adaptable, and motivated by work that genuinely matters.

Experience

Strategy & Operations Intern – Private Equity

Jul 2026 – Present

Nzyme
Supporting the fund’s operational infrastructure at the intersection of strategy and execution, with a focus on building internal tooling to streamline fund logistics.

- **Tool Design & Development:** Designed and developed internal tools to structure and automate operational workflows, improving efficiency and traceability across fund logistics processes.
- **Operational Strategy:** Contributed to the strategic design of operational frameworks supporting day-to-day fund management and execution.

Product Analyst

Feb 2026 – Jul 2026

Finaipro
Took on expanded responsibility for product strategy and quality across the AI equity research platform, growing from technical development into financial analysis, product ownership, and cross-functional execution.

- **Product Quality & Oversight:** Owned end-to-end QA across multiple products, including the AI equity report module, leveraging deep technical knowledge of the underlying system to ensure financial accuracy and reliability across releases.
- **Strategic Contribution:** Participated in new product strategy and roadmap planning, including portfolio construction frameworks and sector allocation methodologies.
- **Cross-Functional Execution:** Operated at the intersection of finance and technology, grounding product decisions in both financial logic and technical feasibility within a fast-paced startup environment.

Generative AI Intern

Sept 2025 – Feb 2026

Finaipro
Built and deployed a production-grade Generative AI module for a Fintech startup, automating equity report generation from end to end.

- **Architecture & Deployment:** Designed and shipped a full-scale GenAI module integrated into the core platform, leveraging Azure Cloud Services and OpenAI APIs to deliver scalable, low-latency AI solutions in production.
- **Data Engineering:** Architected robust data pipelines across SQL systems, ensuring high data integrity and reliability for LLM input/output processing.
- **Model Reliability:** Improved financial data accuracy and system reliability through iterative model validation, prompt engineering, and fine-tuning, ensuring consistent and auditable outputs in production.

Education

BSc Telecommunications Services and Technologies Engineering

09/2020 – 06/2026

Polytechnic University of Madrid, Madrid

MSc Computer Engineering Semester

09/2024 – 02/2025

Politecnico di Torino, Turin
Erasmus semester abroad during 4th year of BSc. MSc-level coursework.

Science Baccalaureate

09/2018 – 06/2020

Nuestra Señora del Pilar School, Madrid

Skills

Technical: Python, SQL, Azure Cloud Services, REST APIs, Git, OpenAI APIs, Prompt Engineering, LLM Fine-tuning, Generative AI, Data Pipelines, LaTeX.

Finance: Equity Research, Portfolio Construction, ETF Construction, Sector Allocation, Financial Data Analysis, Benchmarking, Capital IQ.

Product: Product Analysis, QA Testing, Product Lifecycle Management, Requirements Gathering, Roadmap Planning, Agile, Scrum.

Certifications

TOEIC – C1 (990/990) <i>ETS</i> Credential ID: 59t5XZZg7ZfQQ	Dec 2023
C1 – Certificate in Advanced English <i>University of Cambridge</i> Credential ID: A9865594	Jun 2019
Spanish: Native • French, Italian: Elementary Proficiency
